

## EUROFLOR INTRODUCED BY RIGBY TAYLOR

Following extensive trials at golf clubs in the UK, Rigby Taylor, in partnership with seed breeder Top Green, launched EUROFLOR urban flower seed mixtures at BTME.

Brightening up the golf course, natural floral cultivars are mixed with wild flower species to provide horticultural excellence.

These mixes help to provide areas which will give back to nature what has often been taken away by the destruction of natural habitats.

Attracting wildlife throughout their long-flowering period from late spring well into the autumn they offer animals and insects cover and an extended food source.

Through trials and tests at 18 UK sites Euroflor has been found to be highly successful on varying 'normal' soil types - including loam, sand, clay, stoney and slightly acidic to alkaline soils with a pH of 6 to 8. These colourful mixtures have also performed well on steep slopes but here the sowing rate needs to be increased to 5g per square metre to allow for run-off.

Virtually no maintenance is required on the 14 hand-selected mixtures being introduced which can include mixtures which replicate a club's corporate image.
