

WATER MANAGEMENT

Penetr8-R

A highly effective surfactant formulation that accelerates the removal of excessive surface water. A pre-conditioner application to water repellent soils prior to commencing a wetting agent programme

CORROSIVE

1 litre e

Contains biodegradable Diocetyl sulphosuccinate surfactants

Penetr8-R Directions for Use

Programme applications to pre-condition water repellent (hydrophobic) soils prior to wetting agent treatments. Apply Penetr8-R also to assist in removing standing water to prevent 'puddling' and to assist the downward flow of water through the rootzone into drains and soakaways. Applications can be made at any time of the year providing the soil is not frozen or totally waterlogged. Repeat as necessary at 6-8 week intervals. Applications throughout the summer will help in the management of hot spots and localized Dry Patch.

A single application will penetrate between 25 and 30cms reaching maximum depth within 30 minutes.

Application rates

Area of use	Penetr8-R	Water Volume	Area Treated
Golf greens, golf tees	250-500ml	40 litres	500sq.m
Bowling greens	750-1,500ml	120 litres	1,500m ²
Golf fairways, sports pitches	5-10 litres	700 litres	1 ha

Repeat as necessary (usually 4-6 weeks). Penetr8-R will not scorch and watering-in is not required following application. Where a problem condition is particularly severe, additional benefits will be gained by applying Penetr8-R following mechanical aeration.

Health and Safety: Eye Damage: 1. Causes serious eye damage. Skin Irritant: 2. Causes skin irritation. Wash thoroughly after use. Wear protective gloves/protective clothing/eye protection/face protection. IF ON SKIN: Wash with plenty of soap and water. IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. Take off contaminated clothing and wash before reuse.
