DURALINE

Concentrate

A concentrated, bright white marking compound for use on grass surfaces. Can be used at any time of the year and applied through any type of spray or transfer wheel machine

Directions for use

Dilute before use. Add Duraline Concentrate to clean cold water and stir well.

Initial Marking: Mix in the ratio of 1 part Duraline Concentrate with up to 3 parts water.

Over-marking: Mix in the ratio of 1 part Duraline Concentrate with up to 7 parts water. Dilution ratios can be varied according to ground and weather conditions. When applying through a spray machine, always pour through a filter funnel.

Best results are achieved if used within 12 months of purchase.

Health & Safety
Non-hazardous, non-flammable. Observe normal hygiene precautions.
