

OUTFIELD RANGE

Conventional release – maxi granular fertilizers

WHY OUTFIELD FERTILIZERS

- › Granular fertilizers that release nutrients over a 6-8 week period
- › Dependable and consistent performance
- › Improved uniformity and accuracy of application
- › Advanced granule size spectrum compared to traditional outfield fertilizers
- › New **BiO** range contains seaweed and humates

Summer Boost 14-6-8 +2MgO +seaweed	NPK with added Mg and seaweed for improved colour and roots	1.0-3.0	20	25 35	800 571	NUTRIENT RELEASE FOR 6-8 WEEKS	35.0 49.0	15.0 21.0	20.0 28.0
Zero P 12-0-9 +0.5Fe +seaweed	NK fertilizer with Fe and seaweed for plant health	1.0-3.0	20	25 35	800 571	NUTRIENT RELEASE FOR 6-8 WEEKS	30.0 42.0	0 0	22.5 31.5
Pro-seed 8-12-8 +3MgO +Zn	Pre-seed with Mg and Zn for improved colour and germination	1.0-3.0	20	25 35	800 571	NUTRIENT RELEASE FOR 6-8 WEEKS	20.0 28.0	30.0 42.0	20.0 28.0

The **Outfield** range provides homogenous, traditional mineral formulations with high quality, easy to apply granules that give a dependable performance.

The highly soluble nutrient sources used in each product produce a good initial visual effect under a wide variety of environmental conditions, making them suitable for autumn/winter or spring/summer applications. Some formulations are ideal for pre-seeding.

Outfield BiO is a new range of organic based fertilizers containing macro- and micro-nutrients, seaweed and humates in a new homogenous Mimax granule. Seaweed improves drought resistance, and in conjunction with the humates, improves root mass and length.
