

EcoPlug Max

tree stump regrowth control

Simple, non-spray method of killing the root system of tree stumps and preventing re-growth

WHY EcoPlug Max

- The new effective way to solve a 'growing' problem
- Each Ecoplug Max contains 300mg of formulated glyphosate herbicide

How EcoPlug Max works

Trees growing close to buildings, roads, powerlines, bridges, amenity areas and heritage sites can be a problem. When felled, such trees will continue to grow and new shoots will grow from the stumps unless treated. This can result in substantial foliage re-growth.

Ecoplug Max provides a simple and effective way to kill the root system of tree stumps with no effect on surrounding trees. The plug contains a herbicide, which is enclosed within a plug. When inserted into the tree stump, the herbicide is released which results in the kill of the entire root system. Because the herbicide is contained within the tree stump, it has no effect on surrounding trees or vegetation and, will not affect humans, animals or the wider environment.

Ecoplug Max has a high efficacy rating of 95-100% and its selective method of herbicide release will reduce the use of chemicals by 90%, compared to traditional methods.

Ice Clean

granular formulation

Fast and clean alternative to rock salt and road grit that prevents and removes ice from frozen hard surfaces

WHY Ice Clean

- A fast and clean alternative to the traditional use of rock salt and road grit
- Effective down to -30°C for up to 48 hours
- Generates heat on contact with ice by way of an exothermic reaction
- Will not stain shoes or carpets – just vacuum away any excess

How Ice Clean works

Because **Ice Clean** is 99% pure Calcium Chloride it is the best available de-icer and snow melt material available and is 30 times more efficient, and faster, than rock salt.

Ice Clean is suitable for all applications on hards surfaces where snow and ice form, but unlike salt it will not stain or leave dirty marks on shoes and carpets. Any residue should simply be vacuumed away.

Product

Detail

Contains: 300mg glyphosate (each plug)
MAPP No: 14741
Pack size: Box of 100 plugs
RT order code: 9979934

Use plant protection products safely. Always read the label and product information before use.

Product

Detail

Contains: 99% Calcium Chloride
Pack sizes: 20 kg, 12 kg and 1.25 kg shaker packs
RT order code: 20 kg 0105080/20
12 kg 0105080/12
1.25 kg 0105080/001

Use plant protection products safely. Always read the label and product information before use.
