

Bioverse System

A sustainable driveway system which absorbs carbon having a positive impact on the environment.

Bioverse matches a range of Marshalls driveway and paving products making it ideal for driveways, parking areas, pathways and features.

NEW

How does it work?

The Bioverse system consists of reduced-carbon concrete modules, specially formulated Bioverse Grass Seed and a carefully designed sub base. The elements of the system together create a hardstanding area which is not only attractive and hardwearing, but is also a Biosphere which takes carbon from the atmosphere.

The Bioverse Paving System becomes carbon neutral over the life of the driveway, providing the grass is maintained.

25mm Bedding/
Regulating Layer

The Bioverse System

Bioverse: **Interlocking Modules**

- Interlocking Bioverse modules allow water to travel between the blocks whilst ensuring structural stability
- Each pack contains two different pebble designs, allowing a wide variety of laying possibilities
- The modules can be used for a wide variety of applications from driveways and additional car parking areas to pathways and soak away areas

Bioverse: **Optimised Grass Seed**

Bioverse seed mixtures are designed to create a dense, attractive appearance and are individually matched to different growing conditions throughout the UK. All mixtures have the ability to absorb CO2 helping you create a landscape which becomes carbon neutral over the life of your driveway.

Bioverse Seed mixtures are;

- Environmentally responsible, with high CO2 lock up
- Are low growing, reducing surface wear and making them ideal for Bioverse driveways
- Have a slow growth pattern so that the grass requires less cutting
- Have a high plant density, to restrict invasion of weeds and alien grasses

Area of UK	Seed type
North	Bioverse GN
South	Bioverse GS
East	Bioverse GE
West	Bioverse GW
