

PHOTON

Permanent green turf paint with UV absorber and optical brighteners

WHY PHOTON

- › Restores natural green colour to discoloured or damaged turf
- › Helps to increase grass surface temperature
- › Last up to 3 months, dependent upon mowing regimes and climate conditions
- › Ideal for prestigious events
- › Can be used to colour divot mixtures

How Photon works

Used in places or at times when natural light is at a premium, **Photon** is ideal to enhance the plants ability to absorb UV radiation and so improve its photosynthesizing ability. **Photon** will provide uniformity of appearance and assist in the disguising of mechanical damage as well as stress.

Product Detail

Contains: UV absorber and optical brighteners
 Pack size: 1 litre
 Pack coverage: 4,000 sq.m
 RT order code: 0422640/01

APPLICATION RATES

Area of use	Photon	Water Volume	Area
Golf greens, golf tees			
Bowling greens, cricket squares	2.5 litres	300-400 litres	1 ha
Sports pitches			

RECOMMENDED PERIOD OF USE

Jan	Feb	Mar	Apr	May	Jun	Jul	Aug	Sep	Oct	Nov	Dec

Use plant protection products safely. Always read the label and product information before use.

“ We are great believers in the benefits that can be gained through the use of products

containing Amino acids. They help the plant to resist stress and we use them in the build up to a match to assist the plant recovery. We use Microlite Activ8, supplemented with Amino-Form LX and MicroDyne through June and July, which is a nutritional combination of micro-granular fertilizers and liquid biostimulants. Impact XP paint is used for line marking at the stadium and on the training pitches at Auchenhowie. ”
