

low-rate selective herbicide

# Super Selective Plus

A liquid selective broad-leaved weed herbicide for the control of many annual and perennial weeds in managed amenity turf and amenity grassland

## WHY Super Selective Plus

- Three active ingredients in one formulation, give rapid control of most commonly occurring broad-leaved weeds in turf
- Lower application rates from high concentrations of active ingredients
- Broad spectrum of activity, controls many difficult weeds such as Yarrow

## How Super Selective Plus works

An effective combination of three active ingredients (mecoprop-p, MCPA and dicamba) enables this formulation to give good control of most commonly occurring broad-leaved weeds found in turf. The addition of dicamba also gives control of some of the more resistant weed species.

With Super Selective Plus it costs you only for the weed problem you need to control!

## Weeds controlled

**Lower application rate, 1 treatment per season:**

Cat's Ear, Greater Plantain, Hoary Plantain, Lesser Plantain, Ribwort Plantain, Sea Plantain.

**Lower application rate, 2 treatments per season:**

Those above and Creeping Buttercup, Daisy, Dandelion.

**Higher application rate, 1 treatment per season:**

Those above and Bird's Foot Trefoil, White Clover, Common Mouse-ear, Black Medick, Selfheal, Lesser Trefoil (a repeat application may be necessary).

**Higher application rate, 2 treatments (in successive seasons if necessary):**

Those above and Pearlwort, Yarrow.

### APPLICATION RATES – LOWER RATE

Equipment	Super Selective Plus	Water Volume	Area
Power Sprayer	3.5 litres	300-500 litres	1 ha
Max application 2 per year			

### APPLICATION RATES – HIGHER RATE

Equipment	Super Selective Plus	Water Volume	Area
Power Sprayer	5.5 litres	300-500 litres	1 ha
Max application 2 per year			

### RECOMMENDED PERIOD OF USE
