

JUNCTION

New generation herbicide specially formulated for contractors for regular maintenance control of weeds in sports, amenity turf and amenity grassland

WHY JUNCTION

- Unique micro-emulsion technology increases herbicidal activity
- Controls a wide range of common turf weeds
- Can be used on new grass only two months after sowing

Area treated by 1 litre (sq.m)

How Junction works

JUNCTION* TURF HERBICIDE uses the power of florasulam to reduce the overall amount of active ingredient applied as required by the Sustainable Use Directive (SUD). This not only minimises the active loading on the environment, but also reduces the amount of product needed to be carried to a job. The florasulam is combined with a low rate of 2,4-D, which broadens the weed spectrum of Junction.

Junction has been cleverly formulated as a suspo-emulsion in water, allowing it to be applied in 100 litres water per hectare. This markedly reduces the time needed to complete a spray operation. Junction can be applied after only 2 months to spring or summer sown turf. In addition, reseeding can be carried out just 4 weeks after application.

Product Detail

Contains: Florasulam and 2,4-D
MAPP No: 12493
Pack size: 5 litres
Pack coverage: 41,667 sq.m
RT order code: 0423400/05

APPLICATION RATES			
Equipment	Junction	Water Volume	Area
Power Sprayer	1.2 litres	100-400 litres	1 ha
Knapsack Sprayer	12ml	10 litres	100m ²

RECOMMENDED PERIOD OF USE

Jan Feb Mar **Apr** **May** Jun Jul Aug Sep Oct Nov Dec

Use plant protection products safely. Always read the label and product information before use

Turn right for more efficient weed control!
