

TRAILBLAZER TRIO

A temporary blue, **tank mix colourant** that highlights spray overlap and missed areas. Contains two water conditioners for improved pesticide activity.

WHY TRAILBLAZER TRIO

- » Highlights spray on target surface
- » Appears as a dark green colour on turf
- » Colour is temporary, low staining
- » Contains water conditioner/softener
- » Tank mix compatible

How Trailblazer Trio works

When added to the spray solution, operators can see the pattern of the spray, thereby reducing up to 20% costly and wasteful overlap.

Missed areas are also immediately identified. A water conditioner and softener are included to dissolve carbonates in the spray solution that reduce chemical effectiveness and neutralize cations which cause adverse reactions with pesticides.

Product Detail

Pack size: 1 litre
 Pack coverage: Makes 1,000 litres of spray solution
 RT order code: 0423944/01

APPLICATION RATES		
Formulation	Trailblazer Trio	Spray Solution
Liquid	20-50ml	20 litres
	1-2.5 litres	1,000 litres

Use plant protection products safely. Always read the label and product information before use

WATER-CONDITION-R

Acidifies and **reduces water hardness**

WHY WATERCONDITION-R

- » Improves performance of pesticides and micronutrients
- » Softens irrigation water
- » Use in knapsacks and boom sprayers
- » Ideal for use with glyphosate, selective herbicides, foliar nutrients, liquid fertilizer and fungicides

How Watercondition-R works

This product has 3 modes of action:

1. An acid that dissolves the carbonates in the spray solution and reduces the ability to react with pesticides or micronutrients.
2. Water softeners - widely used in the water treatment industry to neutralise carbonates so they are not able to further react with pesticides or micronutrients.
3. A buffer that regulates the pH of the spray tank or irrigation solution to a slightly acidic solution. Ideal for nutrient and pesticide uptake by the plant.

By conditioning water prior to addition of pesticide or nutrients antagonism from impurities in the water are removed and the products are applied in a pH of approximately 5.0 which optimizes uptake.

Use of **Condition-R** should be part of normal practice on every spray application to enhance performance.

Product Detail

Pack size: 5 litres
 Dose Rate : 250-500ml per 100 litres spray water
 Pack coverage: Variable
 RT order code: 0423860/05
