

ICADE

A **selective herbicide** for effective control of Japanese knotweed, hogweed, marestail and other tough weeds in amenity grassland

WHY ICADE

- › Effective against tough and invasive weeds
- › Rainfast in 1 hour
- › Safe to grasses
- › Virtually no odour
- › Outstanding translocation to the weed roots

How Icade works

Icade is a new and unique herbicide that will provide effective control against difficult to control and pernicious weeds such as Japanese knotweed, hogweed, rosebay willow herb and brambles. In a programme Icade has also shown good control of marestail and horsetail. It's low odour makes it an ideal product to use in areas where public alarm may be generated by smells commonly associated with herbicide application, and being rainfast in 1 hour is a major benefit over glyphosate.

Product Detail

Contains: 12 g/litre aminopyralid and 120 g/litre of triclopyr

MAPP No: 16182

Pack size: 1 litre

Pack coverage: 2,500 sq.m

RT order code: 0434105

APPLICATION RATES			
Equipment	ICADE	Water Volume	Area
Power Sprayer	2-4 litres	200-400 litres	1 ha
Knapsack Sprayer	150-200ml	10-20 litres	500m ²

RECOMMENDED PERIOD OF USE											
Jan	Feb	Mar	Apr	May	Jun	Jul	Aug	Sep	Oct	Nov	Dec

Use plant protection products safely. Always read the label and product information before use

Icade is quickly transported throughout the target weed and is ideal for weed control in such areas as railway and motorway embankments, industrial areas, under powerlines, in cemeteries, utility areas and around groundsmen and greenkeeper sheds.
