

GALLUP BIOGRADE AMENITY

A foliar-applied translocated **glyphosate herbicide** for the control of emerged weeds in amenity and industrial situations, forestry and aquatic areas

WHY GALLUP BIOGRADE AMENITY

- › Can be used any time of year when weeds are green and actively growing
- › Non-hazardous COSHH classification
- › Bio-degraded by soil micro-organisms
- › Can be used for aquatic weed control
- › BioEnhance™ Adjuvant Technology

How Gallup Biograde Amenity works

The active ingredient glyphosate acts by blocking the plant's enzymatic system. The BEAT formulation ensures the herbicide is readily absorbed through the leaf cuticle and is able to circulate throughout the plant and right down to the roots. As a result not just the foliage but the whole of the plant is killed.

Gallup Biograde Amenity is adsorbed easily onto the soil particles so does not leach and is also broken down by the soil bacteria into harmless natural substances.

Aquatic Weed Control

Gallup Biograde Amenity can be used for the control of waterside and emergent weeds including Reeds, Rushes, Sedges, Grasses and Watercress, and against the floating weeds White Water-lily and Yellow Water-lily. As with any aquatic herbicide, prior approval should be sought from appropriate authorities

Product Detail

Contains: 360g/l (30.7% w/w) glyphosate
 MAPP No: 12716
 Pack size: 5 litres
 Pack coverage: Uncropped land: 8,333-12,500 sq.m
 Forestry: 5,000-10,000 sq.m
 Aquatic: 8,333-10,000 sq.m
 RT order code: 0488276/05

RECOMMENDED PERIOD OF USE

Jan	Feb	Mar	Apr	May	Jun	Jul	Aug	Sep	Oct	Nov	Dec
