

# FUSION

A contact and systemic fungicide with eradicant and preventative activity against most major turf diseases

## WHY FUSION

- › Controls Fusarium Patch, Red Thread, Dollar Spot, Anthracnose, Leaf Spot and Rust in amenity turf
- › Combination of trifloxystrobin and tebuconazole offers both contact and systemic activity
- › Wide window of application over the season – can be used any time of year
- › Low application rate gives cost effective control
- › Ideal as part of an integrated disease management programme

### Product Detail

Contains: 200g/l (18.2% w/w) tebuconazole and 100g/l (9.1%) trifloxystrobin

MAPP No: 17225

Pack size: 1 litre and 250ml

Pack coverage: 10,000 sq.m (1ha)

RT order code: 0632310/01 or /250.

APPLICATION RATES				
Equipment	Fusion	Water Volume	Area	
Vehicle Mounted Hydraulic Sprayer	1 litre	400-500 litres	1 ha	
Knapsack Sprayer	50ml	20-25 litres	500m <sup>2</sup>	

RECOMMENDED PERIOD OF USE											
Jan	Feb	Mar	Apr	May	Jun	Jul	Aug	Sep	Oct	Nov	Dec
Use plant protection products safely. Always read the label and product information before use											

## How Fusion works

Fusion is a dual action fungicide containing both trifloxystrobin and tebuconazole, offering both protective and some eradicant activity.

This product has very good rainfast properties, provides long-lasting control and can be used all year round, even at very low temperatures providing the weather conditions are appropriate.

Fusion can be used when grass is either dormant or actively growing, ideally applied prior to or immediately disease symptoms first appear. If grass is being mown, Fusion should be applied after cutting and further mowing should not take place until at least 48 hours after treatment.

Alternate with a fungicide having a different mode of action.
