

# Foremost

systemic turf fungicide

Highly active ingredients with different modes of action provide systemic activity and stops spore germination on leaf surface

## WHY Foremost

- Contains two highly active fungicides with different modes of action
- Preventative, curative, eradicant and systemic action
- Ideal partner in a tank mix combination
- Stops germination of spores on leaf surface
- Effective under cold conditions

## How Foremost works

Applied at the early stage of the disease **Foremost's** curative activity provides outstanding results. Alternatively, the product can be applied before the onset of the disease during periods when disease risk is high, so preventing infection occurring. **Foremost** offers a three-way route for the achievement of superb disease control, delivering preventative, curative and eradicant activity.

The combination of actives in **Foremost** have complimentary modes of action ensuring excellent disease control under a wide range of situations. **Foremost** is particularly suited for use in tank mixtures and integrated fungicide programmes.
