

LINE MARKING PAINTS

Impact

The award winning paint system delivering unbeatable bright, crisp lines with significant cost saving benefits

WHY IMPACT PAINTS

- › Ready to use – no measuring, no mixing, no mess
- › Time saving – fast start, fewer stops, quick finish
- › Cost saving – less paint, more pitches
- › Highly visual – optical brighteners give bright white lines
- › Long lasting – highly rain resistant, lines last longer
- › Flexibility – all surfaces...grass, hard surface, synthetics
- › Environmental – NO water, less waste

Impact THE RANGE

Impact HD

- Next generation Impact paint
- Unbeatable, ultra-bright lines
- Extra long lasting

Pack size: 10 litre drum
 Area of use: Grass
 Application: Ready-to-use with iGO, Glider or Armaline

Impact Green-Out **NEW**

- Masks out white lines
- Green pigment blends well with grass
- Spray using Impact green cone nozzle

Pack size: 10 litre drum
 Area of use: Grass
 Application: Ready-to-use with iGO, Glider or Armaline

Impact XP

- Staying power, lasts much longer
- As little as 1.1litre per pitch
- Bright white and superior adhesion

Pack size: 2 x 5 litre Eco-bag, 5 &10 litre drums
 Area of use: Grass
 Application: Ready-to-use with iGO, Glider or Armaline

Impact Pure

- 98.6% natural ingredients
- No Titanium Dioxide
- No synthetic resins

Pack size: 10 litre drum
 Area of use: Grass
 Application: Ready-to-use with iGO, Glider or Armaline

Impact

- Excellent spray-ability
- Highly stable and consistent spray
- Bright white or vibrant colours

Pack size: 5 &10 litre drums 
 Area of use: Grass
 Application: Ready-to-use with iGO, Glider or Armaline

Impact Hard Surface

- Special binders and stickers
- Acrylic based formulation
- Range of non-grassed surfaces

Pack size: 5 litre drum 
 Area of use: Tarmac, concrete
 Application: Ready-to-use with iGO, Glider, iGO Mini

Impact

Paint and machine in perfect partnership

Never has there been a more detailed programme of research and development to create the most effective partnership between the spray machine and the paint itself. Such a partnership resulted in Impact being awarded the Queens Award for Innovation and Queens Award for Enterprise, unique events for this industry.

Integrating paint formulation expertise with advanced application equipment and specially engineered spray cone nozzle technology has created a system that offers groundsmen the most superior pitch line marking performance available.

The Impact system requires NO added water to the paint formulation. Just connect the appropriate 'ready-to-use' Impact paint drum or Eco-bag to a partner machines and marking can begin. NO, measuring, NO mixing, NO pouring and NO mess!

But it is not just speed of marking that is of benefit. Superior quality of lines are achieved that have excellent rain resistance and are long lasting.

Just one 10 litre drum of Impact paint can over-mark at least 8 standard sized football pitches without the downtime of having to stop for the process of re-mixing or re-filling. And, if 3 x 5 litre Eco-bags are carried on the machine, up to 12 pitches can be over-marked.

In the case of the environmentally

responsible Eco-bag, pack disposal is very easy. When emptied, it is just rolled up and disposed of as normal household waste.

Studies by Doncaster Metropolitan Borough Council achieved major savings by switching their pitch line marking programme from dilutable concentrate paints. By using Impact ready-to-use paint, applied by iGO machines, on all their pitches they saved over **£16,000 per annum** and, the additional environment benefit of saving over **36,000 litres** of water, which would otherwise have been wasted.

A range Impact paint formulations are now available for use on natural grass surfaces, synthetic grass and hard surfaces. Each formulation can be used with a choice of spray nozzle that will link the speed of pitch marking application with the quality and longevity of line required.

We have a paint for all sports surfaces
