

# DURALINE

The market leading range of liquid line marking paints

## LINE MARKING PAINTS

Rigby Taylor's market leading range of liquid line marking paints offer exceptional performance and excellent reliability. Working closely with skilled paint formulators and professional groundsmen, the company has developed a new range of paints for every purpose, whether used with spray jet or transfer wheel marking machines.

### DILUTABLE CONCENTRATES

#### STANDARD IMPROVED FORMULATION

- Superb, cost-effective line paint selection
- Produces a crisp, bright, durable line
- Easily diluted and contains an anti-clogging additive
- High pigment content offers excellent water resistance
- In white and a range of colours

Pack size:	10 litres
Area of use:	Grass
Application:	Any spray or transfer wheel marking machine
Dilution:	Initial Marking: 2:1 ratio water to paint Overmarking: 4:1 ratio water to paint

#### CONCENTRATE EXCELLENT VALUE FOR MONEY

- Concentrated, bright-white marking compound
- Specially formulated for pitches requiring frequent re-marking
- Contains a high pigment content and excellent water resistance
- In white and a range of colours

Pack size:	10 litres
Area of use:	Grass
Application:	Any spray or transfer wheel marking machine
Dilution:	Initial Marking: 3:1 ratio water to paint Overmarking: 7:1 ratio water to paint

### READY TO USE

#### DUAL READY TO USE

- Polymer-based marking compound for use on grass surfaces
- No mixing or measuring
- Unique, ready to use water resistant formulation
- High viscosity for greater paint transference and surface adhesion
- Produces longer lasting, brilliant white lines
- In white and a range of colours

Pack size:	10 litres
Area of use:	Grass
Application:	Any spray or transfer wheel marking machine

### INITIAL MARKING

#### PRELINE APPROVED & LEGAL

- The only MAPP approved, initial marking product currently available
- Unique, ready-mixed, ready to use, brilliant white paint
- Contains glyphosate for initial marking of turf surfaces
- Produces semi-permanent lines lasting up to 12 weeks
- Requires only one application in one direction
- Satisfies COSHH regulations

Pack size:	10 litres
Area of use:	Grass
Application:	Transfer wheel marking machine

### ARTIFICIAL & HARD SURFACES

#### SUPERLINE HIGH PERFORMANCE

- Provides longer lasting lines and less frequent marking
- High pigment density and greater rain and wear resistance
- Produces brilliant, durable white lines on grass surfaces.
- In white and a range of colours

Pack size:	10 litres
Area of use:	Grass
Application:	Any spray or transfer wheel marking machine
Dilution:	Initial Marking: 4:1 ratio water to paint Overmarking: 10:1 ratio water to paint

#### SUPREME OUTSTANDING WHITENESS

- The ultimate marking compound used by top professional clubs
- Manufactured using the best pigments and binders available
- Produces brilliant white lines that outlast all others
- In white and a range of colours

Pack size:	10 litres
Area of use:	Grass
Application:	Any spray or transfer wheel marking machine
Dilution:	Initial Marking: 5:1 ratio water to paint Overmarking: 12:1 ratio water to paint

#### HARD SURFACE LINEMARKING PAINT

- High quality, water based, anti-slip acrylic/polyurethane paint
- Suitable for use on all-weather hard courts and other sporting areas
- Use a flat fan nozzle when applying through a spray marking machine
- In white and a range of colours

Pack size:	10 litres
Ready to use:	Apply undiluted
Area of use:	Tarmac, concrete & all-weather hard courts
Application:	Any spray marking machine

#### SYNTHETIC GRASS LINEMARKING PAINT

- Acrylic, cost effective line marking paint
- Specially manufactured for use on synthetic pitches
- Produces crisp lines that do not scuff out
- In white and a range of colours

Pack size:	10 litres
Ready to use:	Apply undiluted
Area of use:	Synthetic grass
Application:	Any spray marking machine

## TENNIS COURT SURFACE PAINT

- Special anti-slip paint for coating the playing surface of hard tennis courts.
- Easy flowing acrylic paint with an anti-fungal additive
- Formulated with special anti-slip properties
- Approved to the highest standards
- In light green, dark green, blue and red colours

Pack size:	15 litres
Ready to use:	Apply undiluted
Area of use:	Outdoor tennis hard courts
Application:	As a spray or with a brush or roller

## AEROSOLS

- Applied through the Aeromark aerosol application machines, the results are bright, crisp lines.
- Environmentally friendly, xylene and CFC-free aerosols
- Designed to apply highly pigmented undiluted paint
- Convenient, hard wearing and easy to use
- Provides minimum overspray and waste
- Features a dependable aerosol can action
- In white and a range of colours

Pack size:	750ml
Ready to use:	Straight from the can
Area of use:	Range of surfaces including grass
Application:	Hand-held or through aerosol line marking machines

## LINE MARKING POWDERS

### DRY & WET MARKING

Low cost, free flowing, easily applied powders for use on grass. Ideal to use during the wet winter months as repeat markings build up on the soil. Just 44 kgs to mark a full size football pitch with a 3' (8cm) wide line.

### SNOWCAL 10 & 20/WD

- Snowcal 10 is for a dry line
- Snowcal 20/WD for a wet or dry line

### SNOWCAL 40/80

- Can be applied wet or dry
- High-white base material provides sharp, bright lines

Pack size:	25kg
Area of use:	Grass
Application:	Transfer wheel marking machines

## AEROSOL MARKING MACHINES

The Aeromark linemarking machines have been developed to apply the Rigby Taylor range of high quality xylene and CFC-free 750 ml aerosols.

### AEROMARK LINEMARKER

- Excellent build quality
- Operator sight guide
- Space for holding additional cans
- Adjustable line widths
- Sharp, well defined lines

### AEROMARK LIGHTWEIGHT MARKER (MODEL NOT SHOWN)

- Ideal for marking curves
- Lightweight for ease of use
- Single aerosol carrier
- Adjustable line widths
- Sharp, well defined lines

## TRANSFER WHEEL MACHINES

Whatever the weather, the season or the ground requirements, we offer a wide choice of machines to make line marking an easy, cost effective and efficient process.

### DIMPLE

Front transfer wheel marking machine – excellent selection for many clubs. Scientifically designed roller transfer wheel to enable clearly defined line to be achieved under most conditions.

- Interchangeable 2 or 3 inch (5 & 8 cm) marking wheels
- Available also as a 4 inch (10 cm) model.
- Choice of standard rubber Pneumatic-tyre wheels
- Tank capacity of 3 gallons (16 litres)
- Marks out approx. 2 football pitches with one filling

### LINESMAN

Light, inexpensive transfer wheel machine – ideal for tennis grass courts.

Ideal for use on smaller grounds or tennis courts (grass).

- Interchangeable 2 or 3 inch (5 & 8 cm) marking wheels
- Choice of tank capacity 2 & 3 gallon (9 & 14 litres)
- Available with a 4 inch (10 cm) marking wheel on the 3 gallon model.
- Pneumatic-tyre wheels are optional on each machine

### PRINCE

Light, inexpensive transfer wheel machine – suitable for the smaller ground.

Incorporates the "Rollamark" interleaved transfer wheel for improved performance.

- Tank capacity of 4 gallons (18 litre)
- Interchangeable 2 or 3 inch (5 or 8 cm) marking wheel.
- Available with a 4 inch (10 cm) marking wheel
- Both models have the option of pneumatic-tyre wheels
